

# AURA: Autonomous Incident Report

---

## Incident Overview

<b>Incident ID:</b>	incident-1763318239789
<b>Detection Time:</b>	17/11/2025, 12:07:33 am
<b>Status:</b>	RESOLVED

## AI Analysis

<b>Root Cause Analysis:</b>	AI analysis failed (Failed to retrieve resource because it doesn't exist. Retry the request with a different resource identifier.). Using rule-based fallback. Alarm name 'HighErrorAlarm' suggests a transient error.
<b>Remediation Plan:</b>	Automated response executed
<b>AI Provider:</b>	Rule-Based Fallback

## Remediation Execution

<b>Action Taken:</b>	RESTART_LAMBDA
<b>Target Resource:</b>	Unknown
<b>Status:</b>	Completed

## Summary

The system detected and autonomously remediated an incident. The AI analysis identified the root cause and executed the remediation plan without manual intervention. The infrastructure has been restored to a healthy state.
