

# AURA: Autonomous Incident Report

---

## Incident Overview

<b>Incident ID:</b>	incident-1763365466420
<b>Detection Time:</b>	17/11/2025, 1:14:33 pm
<b>Status:</b>	RESOLVED

## AI Analysis

**Root Cause Analysis:** AI analysis failed (Failed to retrieve resource because it doesn't exist. Retry the request with a different resource identifier.). Using rule-based fallback. Alarm name 'HighErrorAlarm' suggests a transient error.

**Remediation Plan:** Automated response executed

**AI Provider:** Rule-Based Fallback

## Remediation Execution

**Action Taken:** RESTART\_LAMBDA

**Target Resource:** Unknown

**Status:** Completed

## Summary

The system detected and autonomously remediated an incident. The AI analysis identified the root cause and executed the remediation plan without manual intervention. The infrastructure has been restored to a healthy state.
